17•MAR•06

## Transforming the Business Enterprise

**LTG Steven W. Boutelle**

Chief Information Officer/G-6

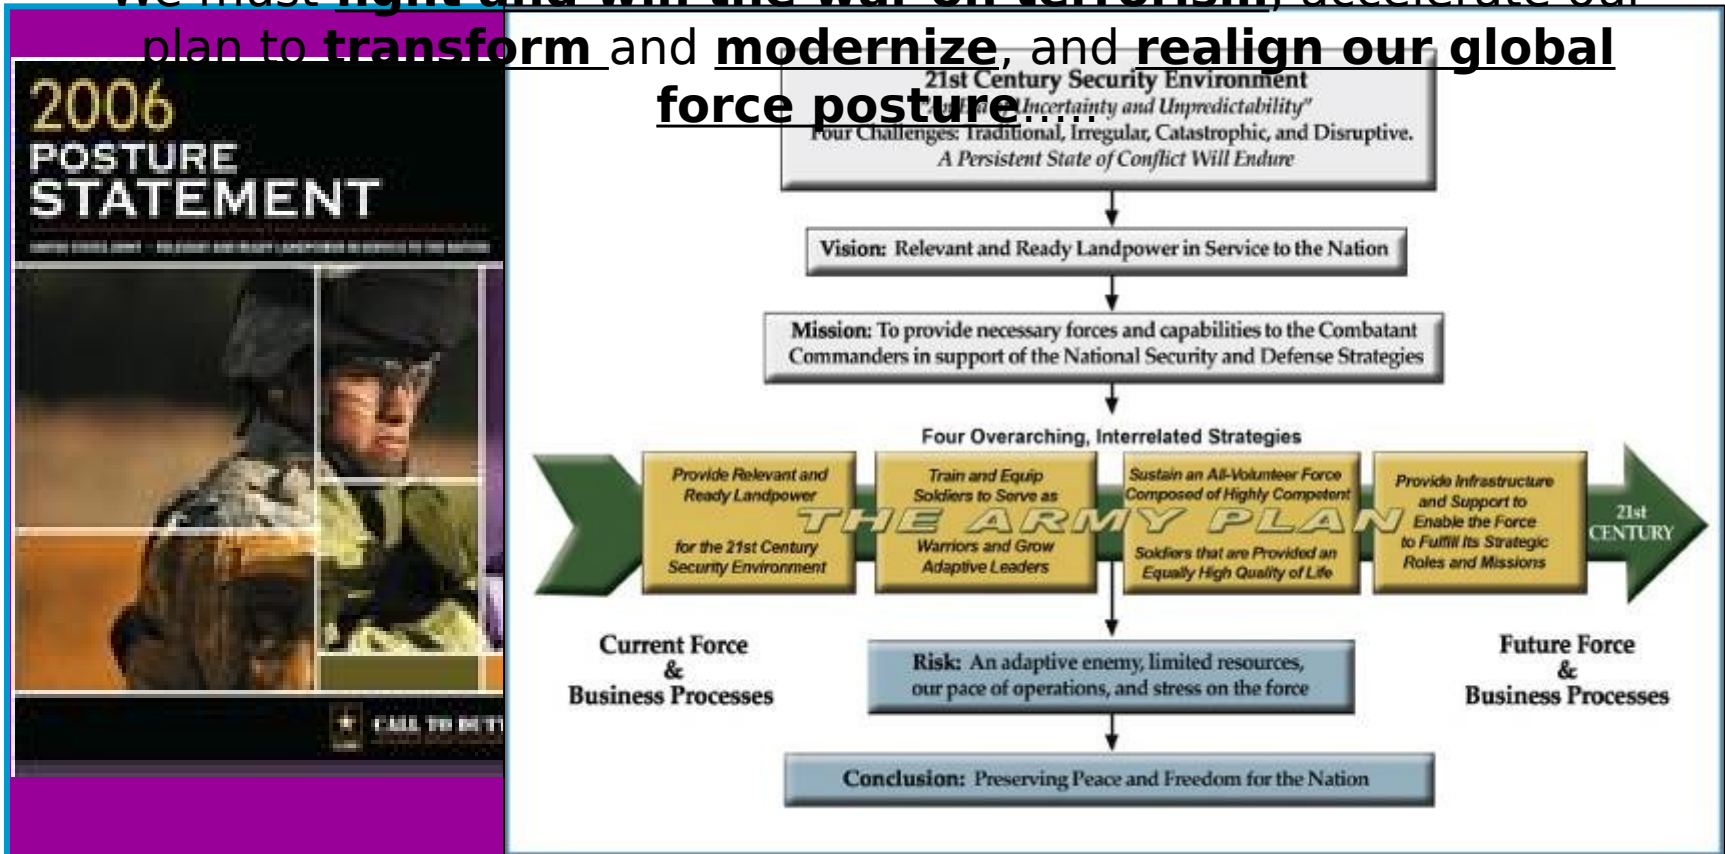

**Call to Duty: 230 Years of Service to Our Nation!**

# The New Reality

**The Army Plan is driving change at an unprecedented pace.**

We must **fight and win the war on terrorism**, accelerate our plan to **transform** and **modernize**, and **realign our global force posture**.....

**We are executing the Army Plan to accomplish our mission and realize our vision.**

# Why a 500 Day Plan?

- **To achieve the Vision:**

Deliver a joint net-centric information enterprise that enables warfighter decision superiority

- **To complete the Mission:**

Provide architecture, governance, portfolio management, strategy, command, control, communications, computers and information technology, acquisition oversight and operational capabilities to enable joint expeditionary net-centric dominance for the Army

- **To maintain the focus**

- ♦ We are an Army engaged in a Global struggle
  - ...facing ever increasing complex irregular challenges

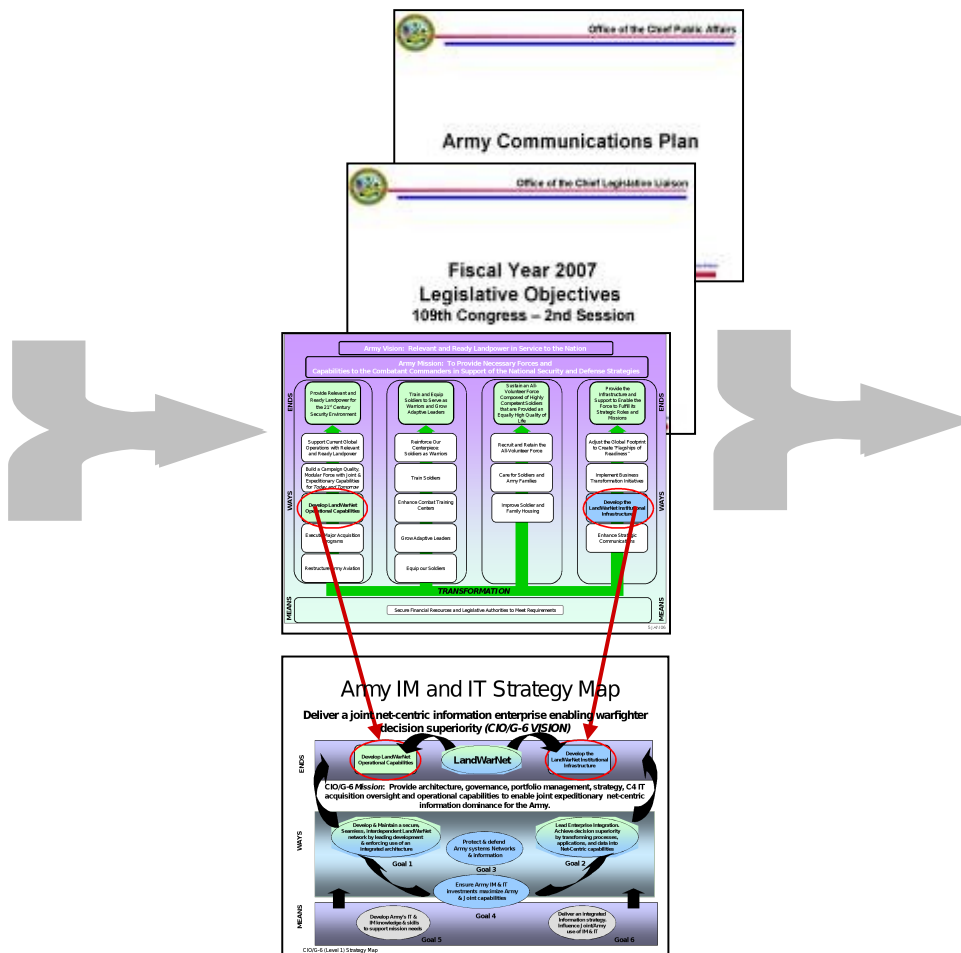

# Strategic Alignment and Execution

## Metrics

Notional cover...for illustration only

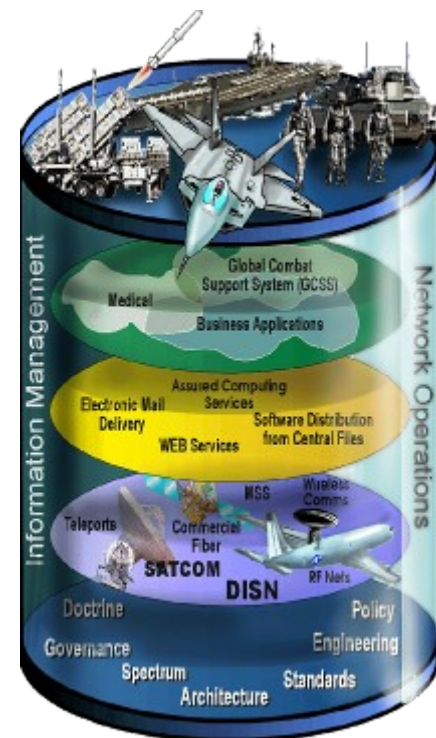

# Goal 1

## Develop and maintain a secure, seamless, interdependent LandWarNet Network

- Signal Restructure
- Network Architecture Development
- Army Implementation of DOD Net-centric Data Strategy
- **CTSF - BC and BE Interoperability**
- Development of Army Enterprise NetOps Integrated Architecture (AENIA)
- **Installation Infrastructure Improvement** (I3MP, Single DOIM, APCs, AD, Exchange 2003, MS Enterprise Licenses)
- IT/VI Metrics Program
- **Joint Network Node** (Systems Architecture, Regional Hubs, JIOC-I)
- DoD Teleport & Ka STARS
- **SATCOM (Wide/Narrow Band, Airborne, MBCOTM, Protected SATCOM)**
- SPECTRUM
- Future Combat Systems (JTRS, Land Warrior, WIN-T, JNMS)

# Central Technical Support Facility

101st Airborne Division  
writes from OIF, Nov 05:

"JNN works...It provides  
quality DSN services, NIPR  
and SIPR connections faster  
than at Ft Campbell. ..All  
services are functioning."

"JNN is the present and  
must be the future for the  
near-term..."

"... it is the stepping stone  
to the future for the long-  
term."

Current Units - Jan 06

"Fabulous system. Even  
without a lot of training...we  
were able to provide  
connectivity to the BCT in  
short order..."

"The VoIP phones are a big  
winner as well. Very clear  
and user friendly."

"I am running service to  
essentially a small town off  
of the JNN (which is handling  
the load well beyond my  
expectations)."

# One Stop Shopping

## \$5 Billion World-wide Satellite Systems ID/IQ Contract

**PEO EIS PM DCATS News**

Proj Mgr, Defense Communications & Army Transmission Systems (PM DCATS)  
Release No: 05-11-02  
Contact: Stephen Larsen (732) 427-6756 Stephen.Larsen@US.Army.MIL

**\$5 billion World-Wide Satellite Systems contract will offer one-stop shopping for federal agencies**

FORT MONMOUTH, N.J. – Federal agencies – both DoD and non-DoD – requiring commercial satellite terminals and associated services will soon be able to order what they need, when they need it, from the World-Wide Satellite Systems (WWSS) contract, a comprehensive indefinite delivery/indefinite quantity (ID/IQ) contract.

Army officials expect the WWSS solicitation to be released to industry in the first quarter of fiscal year 2006, with contract award slated for the third quarter of fiscal year 2006.

A partnership of the Project Manager, Defense Communications and Army Transmission Systems (PM DCATS) and the Project Manager, Warfighter Information Networks-Tactical (PM WIN-T), the WWSS contract will have a ceiling value of \$5 billion over a term of five years.

The WWSS contract will offer six commercial satellite terminal types: Combat Support Service Very Small Aperture Terminals (CSS VSATs), fixed-station satellite terminals, flyaway VSATs, military-certified satellite terminals, prime mover/trailer-mounted satellite terminals and deployable satellite earth terminals. Depending on user requirements, these satellite terminals may be required to operate on any military or commercial satellite in the C, Ku, X and Ka bands.

"We plan to award the WWSS contract to up to six prime contractors," said Kevin Carroll, the U.S. Army's Program Executive Officer, Enterprise Information Systems (PEO EIS). "Each prime contractor will be required to provide complete turn-key solutions, including hardware, software, support services and data."

**Order SATCOM Services**

**Combat Support Service  
Very Small Aperture Terminals  
(CSS VSATs)**

**Flyaway VSATS**

**Military certified satellite terminals**

**Fixed Station satellite terminals**

**Deployable satellite earth terminals**

**Prime mover/trailer-mounted  
satellite terminals**

# Goal 2

**Lead enterprise integration to achieve decision superiority by transforming processes, applications and data into network-centric capabilities across the Army.**

- Army Mission Area Domain Architecture Development
- Community of Interest Development
- Enterprise Governance
  - ...AKM Memoranda
  - ...Clinger-Cohen Act Assessments

## KATRINA HURRICANE RELIEF

Home | News | Video | Imagery | Resources

Soldiers, spouses, family members and all members of the U.S. Army who need assistance because of Hurricane Katrina should contact the Army Being Liaison Office at [KATRINA.RELIEF@US.ARMY.MIL](mailto:KATRINA.RELIEF@US.ARMY.MIL), or 800-833-6622.

Rising floodwaters swallow parked cars on Keesler Air Force Base, Miss., Aug. 26, 2005, as Hurricane Katrina hits the region. The base is home to 6,000 military students, personnel, their families and their families. The initial damage to base infrastructure was catastrophic; the base is currently in the assessment and recovery stage. Department of Defense photo.

In the wake of the disaster caused by Hurricane Katrina, the U.S. Army is working in conjunction with the other Armed Services, Federal Agencies, and state and local agencies to rush repairs, help, comfort and security to the ravaged communities. This site serves as a one-stop point for information, help resources and current news about the recovery process.

### HURRICANE KATRINA RELIEF NEWS

# Secure and Reliable Identification

White House  
President George W. Bush

## HSPD-12

For Immediate Release  
Office of the Vice President  
August 27, 2005

Homeland Security Presidential Directive/Hspd-12

Subject: Policy for a Common Identification Standard for Federal Employees and Contractors

(1) Wide variations in the quality and security of forms of identification used to gain access to secure Federal and other facilities where there is potential for terrorist attacks need to be eliminated. Therefore, it is the policy of the United States to enhance security, increase Government efficiency, reduce identity fraud, and protect personal privacy by establishing a mandatory, Government-wide standard for secure and reliable forms of identification issued by the Federal Government to its employees and contractors (including contractor employees).

(2) To implement the policy set forth in paragraph (1), the Secretary of Commerce shall promulgate in accordance with applicable law a Federal standard for secure and reliable forms of identification (the "Standard") not later than 6 months after the date of this directive in consultation with the Secretary of State, the Secretary of Defense, the Attorney General, the Secretary of Homeland Security, the Director of the Office of Management and Budget (OMB), and the Director of the Office of Science and Technology Policy. The Secretary of Commerce shall periodically review the Standard and update the Standard as appropriate in consultation with the affected agencies.

(3) Secure and reliable forms of identification for purposes of this directive means identification (a) is issued based on sound criteria for verifying an individual employee's identity; (b) is strongly resistant to identity fraud, tampering, counterfeiting, and terrorist exploitation; (c) can be readily authenticated electronically; and (d) is issued only by providers whose reliability has been established by an official accreditation process. The Standard will include graduated criteria, from least secure to most secure, to ensure that the Standard is applicable to all Federal agencies. The Standard shall not apply to identification associated with national security systems as defined by 44 U.S.C. 3542(b)(2).

(4) Not later than 4 months following promulgation of the Standard, the heads of executive departments and agencies shall have their personnel and contractors issued identification that meets the Standard, and shall ensure that all contractors and subcontractors are issued identification that meets the Standard as soon as possible, but in no case later than 6 months after the date of this directive.

NOW!!!**

## FIPS Pub 201

FIPS PUB 201  
FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATION

Personal Identity Verification (PIV)  
of  
Federal Employees and Contractors

Computer Security Division  
Information Technology Laboratory  
National Institute of Standards and Technology  
Gaithersburg, MD 20899-4008

February 23, 2006

**Industry  
Partners  
will need  
to be on-  
board!!**

**"Secure and reliable forms of identification" means identification that:**

- 1) is issued based on sound criteria for verifying an individual employee's identity
- 2) is strongly resistant to identity fraud, tampering, counterfeiting, and terrorist exploitation
- 3) can be rapidly authenticated electronically; and
- 4) is issued only by providers whose reliability has been established by an official accreditation process

**"...require the use of identification by Federal employees and contractors that meets the Standard in gaining physical access to Federally controlled facilities and logical access to Federally controlled information systems."**

- Standard for one federal identity card.
- HSPD-12 required Secretary of Commerce (NIST) produce: "a Federal standard for secure and reliable identification"

## Tokens

- "something you are" (biometric) + "something you have" (the card).
- "something you know" (PIN) + "something you have" (the card). This provides for a higher level of authentication assurance.

# Why Thin Client Technology??

- Greater Security:
  - ◆ Security managed at the server
  - ◆ Centralized configuration management and technical support
- Economical:
  - ◆ Less expensive long term cost
  - ◆ Decreases maintenance and replacement cost
  - ◆ Reduces total cost of ownership
- Efficiency:
  - ◆ Reduces bandwidth requirements on

Pine Bluff resident Ernest Matheny said he comes for the music and, of course, the food.

## Senate earmarks \$7 million for biometrics fusion center

From staff reports

CLARKSBURG — More than two years after initially announcing funding for a permanent Biometrics Fusion Center in Clarksburg, the U.S. Senate has approved an additional \$7 million.

The approval came Friday. The Fiscal Year 2006 Defense Appropriations bill now moves to a House conference committee.

In July 2003, the Senate approved more than \$13 million for the project. About \$1.4 million was allocated for planning and design of a permanent center that is expected to be constructed inside the FBI's 1,000-acre complex in Clarksburg.

In a separate piece of legislation that year, more than \$24.5 million in biometric security funding was included in the Fiscal Year 2004 Defense Appropriations bill. About half of that was allocated to the center, then located at the Harrison-Marion Regional Airport.

The center has since moved to downtown Clarksburg.

The permanent center, estimated to cost \$26.6 million, is expected to employ up to 150 workers, Sen. Robert C. Byrd's office has said.

The newest piece of funding

is for construction of the 25,000-square-foot building planned for the permanent center, according to a release from Byrd's office.

With planning already under way, this funding should allow the Army to begin construction in the coming months, according to Byrd's office.

Including the \$7 million, the bill includes more than \$35 million for overall Department of Defense biometrics activities.

The Biometrics Fusion Center has been working very closely with the FBI, using the emerging technology to identify people who may pose a threat to national security.

The center has developed an automated system to identify and catalog the fingerprints of detainees from Iraq and Afghanistan.

The database is housed within the FBI's fingerprint complex and processes, searches and matches fingerprints taken from enemy combatants and others to help identify national security threats.

The center also has developed a system to control access to military installations in Iraq.

The U.S. Army-administered center in Clarksburg tests high-end commercial identification software for military applications.

## Ice truck crashes

# Goal 4

## Ensure Army information management and information technology investments maximize Joint and Army capabilities

- Implementation of Portfolio Management (PfM) Tool
- Army Information Technology Budget
- Domain & Capital Planning Integration
- Add C4IM COTS to MTOE/TOE/TDA
- IT Purchasing Pamphlet
- Monitoring of Army Purchases of Non-Pre-approved IT Equipment
- AKM Goal 1 Waiver Process
- **Enterprise licensing/purchasing**

*\*Each Portfolio Area contains at least three investment areas, covering all CIO MDEPs*
